

Interfacing TNC's to Motorola Mobile Radios

Description:

There are two common families of Motorola mobiles that are used for packet. They are typically single unit (not remote head), with a 16 or 20 pin interface connector on the backside of the radio. There are older models such as the Maxtrac, Radius M100, M120 and similar. Newer models include CDM750's, CDM1250's and the entrie XPR series of mobiles.

16 Pin Connector:

RADIO
